## CAST-IRON COOKWARE

### GIBSON OVERSEAS

The newly launched Isaac Mizrahi line from Gibson Overseas includes colored cast iron pieces in unusual shapes, a piece for the **M Dot line** shown here in mahogany. Other available colors will include teal, lime, orange, black and gun metal.

“Consumers haven’t seen shapes quite like this — sculptural and with beaded accents,” said Sal Gabbay, president, Gibson. “The colors are fun and fresh. It’s cookware that starts a conversation and brings joy to entertaining with something a little new and exciting.”

The collection is available this fall. [gibsonusa.com](http://gibsonusa.com)
